Limit Order Book	NASDAQ's full-depth limit order book for all stocks traded between July 2008 and Oct 2010. Special enrollment: https://lobsterdata.com		

Free Databases

The LEQR forms the foundation for the empirical and computer supported (numeric) theoretical research. It is the internal platform for the exchange of software and numeric algorithms.

Data source	Description	Link
Experimental Data	These datasets were provided by Subprojects A6, A12, C10 at CRC649 and FEEL - Finance and Economics Experimental Laboratory, Xiamen University	📄
FMRI Brain Scan	That data was collected by the Freie Universität Berlin and consist of 17 FMRI brain scans (fmridataXcnew) of different subjects	📄
MD*Base	A collection of freely available datasets and experiment data used in publications of CRC 373 and CRC 649.	📄
